

REDCap Secure Export Module

Purpose

As more institutions implement Secure Research Environments (SRE's), there has been a growing call to restrict data exports to an SRE (vs. local devices). This module allows REDCap Administrators to restrict export-related activities to specific IP ranges associated with an approved SRE.

Overview

There are several REDCap features that allow for the export of PHI/PII. This module allows REDCap Administrators to define SRE's (using IP address ranges) and to control which REDCap features are to be restricted to those ranges.

When implemented, features related to restricted exports are disabled on the user interface screens and hover-text (tooltip) information is displayed to the user. Additionally, certain pages display a message box containing more detailed information/instructions. Messaging is configurable within the EM Control Center settings.

To accommodate multi-site projects, where restricting "all" export locations is impractical, project level settings can be used to exempt additional IP ranges, Users, Documents, and DAG's.

Project-Level EM Configuration

The Secure Export module has 5 project-level exemption settings (not bound by export restrictions):

- Exempt IP Address Range(s)
- Exempt Activities
- Exempt Usernames
- Exempt DAG ID's
- Exempt Document ID's

1. Exempt IP Address Range(s) (not bound by export restrictions):

- These will be applied in addition to Control Center settings.
- Specify the IP address range(s) for the approved SRE export destination(s).
- Ranges should be comma separated or entered on separate lines.

Additional Secure IP Address Range(s)
(applied in addition to Control Center setting)

100.100.100.100,
100.100.100.10 - 100.100.100.99,
10.174.59.38,
192.168.1.207,
192.168.5.10/50

Supported formats (can be mixed and comma-separated):

CIDR	192.168.1.0/24
Range with dash	192.168.1.10 - 192.168.1.200
Subnet mask	172.16.0.0/255.255.0.0
Single IP	8.8.8.8
Mixed	192.168.1.1, 10.0.0.0/24, 172.16.5.10-172.16.5.50

2. Exempt Activities (not bound by export restrictions):

Select activities to be PERMITTED for the current project (not bound by export restrictions):

- Record Dashboard: Download PDF (with data)
- Instrument Page: Download PDF (with data)
- Reports/Exports: Download (after export-file creation)
- Activity Logging: Export
- Field Comment Log: Export
- Other Export Options Tab: Download icons
- Send-It: Disable
- File Repository: Download
- File Repository: Share
- Data Quality: Export Results
- Survey Distribution: Participant List and Invitation Log
- Survey Distribution: Disable Export Log button
- Data Resolution Workflow: Disable Issues Export
- Other Functionality Tab: Disable Project XML w/ Data download
- Mobile App: Disable Data Dump and App Log downloads

3. Exempt Users (not bound by export restrictions):

Exempt Usernames (not bound by export restrictions)
*comma and/or line separated

jdoe1@acme.edu, tfranks71,
bsmith7,
ljones@communitygeneral.org,
gthomas11,
laverne341

4. Exempt Data Access Groups (not bound by export restrictions):

Exempt Data Access Groups (not bound by export restrictions) *comma and/or line separated	2147,3189,3190, 3191, 3192 3193,3194
--	---

5. Exempt Document ID's (not bound by export restrictions):

- Document ID's are displayed on the File Repository page (far right column).

Document ID Exclusion List (not restricted) Enter comma separated list of document id's to be excluded from download/share restrictions.:	1304186 1472825
---	--------------------

Acknowledgements

We gratefully acknowledge the REDCap teams at the [University of Maryland](#) and [Carilion Clinic](#) for reviewing this module prior to release. Their expertise and insightful feedback have contributed to the clarity, usability, and overall quality of this module.
